

# Go

## Monitor and protect personal devices, no matter where they are

Parent protection for personal devices is as easy as downloading an app. The Go app filters all online activity, no matter what network the device is on. Whether a student is at a coffee shop with friends or studying at the library, parents can rest assured that their child's personal devices are always protected.

### Features

#### Check online activity

Parents can view their child's recent searches, sites visited, and videos watched on their child's personal devices.

#### Customize rules

Their family, their rules. Parents can create their own filtering rules that will be enforced wherever the device goes.

#### Pause internet access

Parents can turn internet access on or off with a single tap anywhere, anytime.
