

Would you like to challenge your students and help them hone their research skills?

- This informative friEdOnline course provides educators the tools and resources needed to help students perform reliable, independent research. The learning activities provided enrich and elevate instruction while meeting the diverse needs of the G/T student. Participants learn how to guide students to ask relevant questions and then select the best resources in order to analyze, record and organize the findings. After helping transform an idea into a product, we share creative ways to present the research.

**Recommended for
G/T Maintenance Credit**

**6 hours
Credit**

**Best for Teachers of 4th
Grade & Up**

What is covered in this friEdOnline course?

1. We begin by setting the foundation for learning by building a common vocabulary and understanding of what Gifted/Talented means, according to state and national standards.
2. We introduce you to free tools that help students learn to formulate relevant questions when beginning research.
3. We cover ways to help you understand the importance of using the correct methods of discovering information online.
4. We provide the opportunity for you to design lessons that allow students to encounter challenging problems and solve them resulting in a transformative, memorable experience.
5. You will experience some helpful resources that you can use to guide your students in their own independent learning projects.
6. We finish by discussing multiple ways for students to demonstrate learning and methods of assessment.
